

## CONSULTING & ADVISORY SERVICES

### About ECO-Buy

**ECO-Buy** is an award winning **Centre of Excellence in Environmental Procurement**. We provide independent advice, expertise and resources to help organisations across the public and private sectors reduce their sustainability impacts and achieve efficiency savings through procurement.

We also work with around 250 manufacturers and suppliers of green products through ECO-Find, an extensive online resource that enables organisational purchasers to identify and choose environmentally preferable alternatives.

Eleven years of practical experience, combined with an extensive knowledge of both the 'buy' and 'supply' sides of sustainable procurement, enables ECO-Buy to offer outcome focused solutions to our clients.

### Our Projects

ECO-Buy helps clients build their organisational expertise in sustainable procurement, and understand how to work with their supply chains to achieve better sustainability and efficiency outcomes. Here are a few of our current and recent projects:

Benchmarking the sustainability credentials of key suppliers to the public healthcare sector

Developing a user-friendly guide to green purchasing for tourism businesses

Supply chain analysis for SME manufacturing companies, identifying risks and opportunities

Researching and developing sustainability criteria for food procurement across state government

Delivering forums  
Australia-wide on green  
marketing and  
greenwash for product  
manufacturers and  
suppliers

Capacity building for  
government  
procurement  
professionals

Briefing workshops on  
'How to Buy Green' and  
'Sustainable Supply  
Chains' for a global food  
manufacturer

Developing  
procurement policy  
and guidelines for  
international  
development  
organisation
