Made from 100% bagasse = sugarcane fibre remaining after extraction of juice from sugarcane.

Moulded into disposable & compostable tableware, these products are truly eco-friendly, avoiding pollution from the usual burning of bagasse.

TREE FREE

suitable for hot & cold food/drinks
freezer & microwave safe
fully compostable

PLA BIO PLASTIC

- 140/360/500/700ml round container with lid
- 100/200/360/500ml cup with flat/dome lid
- small, medium, large sushi box
- strawberry punnet

PLA = Polylactic Acid is a biodegradable polymer derived from renewable resources.

Made from the carbon stored in starch plants (corn) through a process of bacterial fermentation.

PETROCHEMICAL FREE

suitable for COLD food & drinks only
freezer safe.

Why not use
biodegradable/compostable plates, cups & cutlery for your next BBQ, party & event?
Look out for the Green Pack certification stamps

Our range of disposable tableware is petroleum & tree free, takes less energy to manufacture and can be composted.

PALM LEAF PLATES

Made from naturally fallen palm sheaths of the Areca palm which is extensively cultivated in South India.

The raw material is pressure cleaned and moulded at high temperatures which also sterilizes the finished plates and bowls.

The manufacturer uses ethical business model whereby he builds clean housing for his employees and pays fair wages.

RENEWABLE RESOURCE

suitable for hot & cold food
oil & water resistant
oven & microwave safe
sturdy but lightweight

available in round, oval, square, hexagonal and rectangular shapes, sizes ranging from 120mm-240mm

PSM CUTLERY

PSM = Plastarch Material is a fully biodegradable polymer derived from GM-Free starch. The manufacturing process is clean - no wastewater, effluent gas or waste residue is discharged.

PSM holds international certificates for biodegradability and compostability.

GM-FREE STARCH

oil and water resistant
heat resistant to 130°C

Packaged in biodegradable PLA bags
