

VICTORIAN LOCAL GOVERNMENT PROGRAM MEMBERSHIP SERVICES 2012/2013

Purchasing decisions are integral to success in improving your sustainability. Systematically considering the environmental impacts of goods and services in purchasing decisions demonstrates your organisation's progress towards sustainability. Sustainable purchasing is also about efficient purchasing, improving material use and saving money

However green procurement is a complex area and unravelling this complexity is where ECO-Buy can help.

ECO-Buy offers an award-winning approach to guide members through green procurement – from getting a green purchasing policy in place, resources based on international best practice, tools and access to one of the most comprehensive databases of green product suppliers in the country.

After twelve years of successful operation, with over 70% membership in Victorian local government and having influenced hundreds of millions of dollars of investment in green purchasing, **ECO-Buy has established itself as a Centre of Excellence in Environmental Purchasing.**

Ongoing membership of ECO-Buy provides your council with the resources and support you need to develop and improve your green purchasing program.

Buying Green with ECO-Buy

WHAT OUR MEMBERS THINK

"ECO-Buy has been incredibly supportive and helpful. We are in the very early stages of understanding the impacts of green purchasing and how this will affect our financial reporting... however, the resources available to ECO-Buy members will be invaluable and we hope to have an action plan developed soon."

"Over the last few years, ECO-Buy has played a very important role in increasing green purchasing in local government and also the profile associated with this activity. Well done."

"The ECO-Buy annual reporting process is an important tool to understand and recognise Council's progress with green purchasing. Measuring green purchasing progress is essential for continuous improvement and meeting broader Council targets and objectives. The report outcomes also encourage us to set even higher goals to reduce our environmental footprint through purchasing."

WHAT ECO-BUY OFFERS

Two membership options are offered in 2012/13. Base membership offers the support, resources and networking opportunities ECO-Buy members have come to expect. In addition, we continue to offer additional services on a fee-for-service basis, including training opportunities, reports, events and consultancy services.

The Accelerator Program is available for those members wanting to 'accelerate' their green purchasing journey through increased support, training time and assistance from experienced ECO-Buy program managers. The benefits of these membership options are detailed as follows.
