

SUSTAINABLE PROCUREMENT ASSESSMENT TOOL

Now you can **measure your organisation's success** in reducing the environmental, social and economic impact of its procurement!

The ECO-Buy Sustainable Procurement Assessment Tool helps you to measure your organisation's **sustainable procurement performance**. It covers all aspects of sustainable procurement, from policy and strategy to products and suppliers.

ECO-Buy, a not for profit Centre of Excellence in Environmental Purchasing, aims to protect and enhance the environment by encouraging the purchasing and supply of environmentally preferable products and services.

WHY IS THE SUSTAINABLE PROCUREMENT ASSESSMENT TOOL IMPORTANT?

1.

It provides a benchmark of your current sustainable procurement status

2.

It measures your ongoing performance, identifying where you are doing well and where the gaps are

3.

It keeps a record of results and provides a framework for reporting

The Sustainable Procurement Assessment Tool is based on both the Mayor of London's Green Procurement Code progress review and on the UK Government's Sustainable Procurement Framework.

london's green
procurement
code

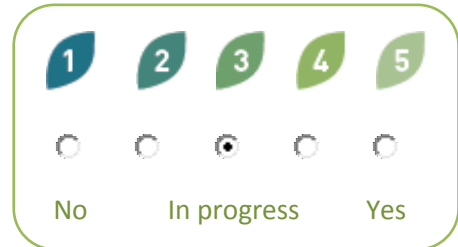

HOW DOES THE SUSTAINABLE PROCUREMENT ASSESSMENT TOOL WORK?

STEP 1:

The first part of the tool involves answering **21 questions** covering the areas of people, policy, process, suppliers and measurement

STEP 2:

The second part of the tool involves completion of **environmental** spend information and the calculation of environmental impacts

RESULTS:

The results of the assessment tool will determine whether your organisation is at **entry, bronze, silver or gold** level

ECO-Buy will also provide you with a **report** that rates your level of performance.
